

At Sapa Railing Systems we have a warehouse that is used to stock our standard Residential railing products. Our stocking quantity is based upon a combination of historical usage and our sales forecasting with the goal to provide you with your order within three days. In this regard, for our planning purposes, it is helpful if you notice trends in the market, new or special product needs, or expect to have a large order, that you let us know.

During 2006 we saw a drastic increase in the number of very large orders, which has in many cases, depleted our stock to the point where we could not keep up with other customers needs. To avoid this, we have set maximum weekly order sizes that we will fill from our warehouse stock.

The result of this is an opportunity! Although we will require at least a four week lead-time when placing a large order because we will make a special extrusion run, we will offer an additional customer discount! To meet the discount quantities for each standard color*, see the chart below.
