## ***Statement on using hazardous substances***

**Dear Customer:**

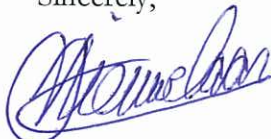

For Sapa Profiles Kft the 1st priority is to supply our customers with products that do not pollute the environment and would not cause health hazards. Therefore our products are made of raw materials that do not contain hazardous substances, and beyond that using of such in the production processes is also forbidden. Our ISO 14001 certified environmental management system makes sure that our products would not emit any hazardous substances either during their life cycle or thereafter, as wastes.

To our Customers that use products we produce in electrical equipment, electronic devices or in any fields of the automotive industry we make the following statement:

Each product manufactured by Sapa Profiles Kft. is compliant with the requirements of the following directives: *2000/53/EC-ELV (End of Life Vehicles)*; *2002/95/EC-RoHS (Restriction of Hazardous Substances)* and *2002/96/EC-WEEE (Waste Electrical and Electronic Equipment)*.

The above mentioned directives do not allow using Lead, Cadmium, Mercury, Hexavalent Chromium (CrVI) and of brominated flame-retardants such as PBB (Polybromobiphenyls) and PBDE (Polybromodiphenylethers) in the products. But having regard the Commission Decision 2005/618/EC a maximum concentration value of 0,1 % by weight in homogeneous materials for lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE) and of 0,01 % by weight in homogeneous materials for cadmium shall be tolerated.

Sincerely,

**John van den Nieuwelaar**

Managing Director
