

SAPA HEAT TRANSFER

Policy – Environment, Health & Safety (EHS)

Sapa Heat Transfer AB shall be the leading supplier of heat transfer solutions in aluminium. To be a sustainable and growing company, EHS shall be an integrated part of all operations. Our ambition is world class EHS, achieved by consistently developing our management system, introduce best practice and continuously improve operations.

It is our belief that all accidents and occupational ill-health can be prevented. All employees and others who work at or visit Sapa Heat Transfer AB, are expected to understand, promote and assist in the implementation of this policy and the accompanying principles.

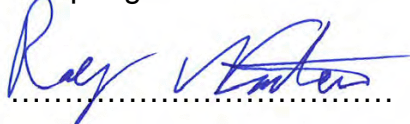

We at Sapa Heat Transfer:

- will not compromise our EHS' ambitions.
- improve the safety culture through encouragement and recognition.
- comply with or surpass relevant legislation and regulations and other requirements to which the organisation subscribes.
- work for an efficient use of resources and minimised environmental impact.
- emphasise communication and visualisation and measure our progress.

All employees contribute by:

- being involved and show commitment to EHS issues.
- follow our safety rules and good housekeeping at the workplace.
- reporting deficiencies that can lead to ill-health, accident, or impact on the environment.
