## Elegant River Living

Atwater Place is the fourth building on the luxurious South Waterfront that has materials provided by Sapa Profiles, Inc. Sapa has provided material for numerous South Waterfront projects.

The railing systems Sapa provided included a custom glass railing system and aluminum privacy screens with value-added in-house paint, engineering, drafting and project management. The custom paint chosen for the project was part of PPG Industries Exotic line of Duranar® Sunstorm paint. This paint had a special appeal to the Architect due to its metallic properties. The custom railing complements the sophistication of the Atwater's exterior.

During any construction project there are constant changes. Andrew Siebert, one of Sapa's Project Managers, states, "our staff experience and expertise has allowed us to stay one step ahead. Overall, this project has been very successful."

*Sapa Railing Systems is your one-stop shop for all Residential, Commercial and Heavy Commercial Projects.*
