

# RAILING SYSTEMS CASE STUDY

**PROJECT:** THE CAMBRIDGE CONDOS

**PRODUCTS:** CUSTOM 6005 ALUMINUM 1/4" TEMPERED GLASS WITH PICKET RAILING SYSTEM AND 6005 ALUMINUM WELDED GRAB RAIL

**LOCATION:** PORTLAND, OR

**BLDG USE:** RESIDENTIAL

**ARCHITECTS:** LRS ARCHITECTS INC.

**CUSTOMER:** DALLAS GLASS

**COMPLETION:** JANUARY 2008

**CONTRACTOR:** LCG PENCE CONSTRUCTION LLC

Located at the foot of NW Heights, The Cambridge Condominiums are the perfect example of contemporary style with classic design.

LRS Architects provided the vision, while Dallas Glass chose Sapa as their reliable railing source, understanding that with the ability to perform all work in-house Sapa would provide them with a product that surpassed their expectations.

Sapa was able to contribute value to this multi-million dollar structure with custom 6005 aluminum series 200 Top Rails with fascia brackets, 1/4" tempered glass work with 5/8" x 5/8" picket in the corners. Sapa also fabricated 6005 aluminum welded stair grab railing for this project. The entire system had a specialized brown coating. Dallas Glass was able to rely on Sapa's engineering and design capabilities when faced with the challenges of the job.

When designing a living environment that could utilize the amazing view of the Portland skyline, Sapa was the clear choice. Our railing system provides an unobstructed view and allows for a safe and pleasant balcony experience.
